Subject: Explo Update

As of 1200 on May 20, 2013, LSP revoked the explosive handling licenses for EXPLO Systems, eliminating the handling of any explosives housed at EXPLO Systems or Camp Minden by any EXPLO Systems employee. EXPLO employees continue to have access to the business portion of their facility, however access to the 97 magazines holding an estimated 18 million lbs. of explosive materials is under the control of the LANG at Camp Minden. As of May 17, 2013 the M6 propellant and Tritonal mixture was secured within magazines at Camp Minden. The remaining hazardous/explosive materials unsecured on-site are an estimated 3,000 lbs. and 3-55 gallon drums of red/pink water, 2-55 gallon drums of residue and 3-50 lb. boxes of Ammonium Picrate (Yellow D), and 700 lbs. of tar/plastic/TNT waste stored in roll-off boxes.
